

Amaya Survivor

When Amaya was two years old, doctors discovered a hole in her heart. She had to undergo open-heart surgery, where doctors repaired the hole with a mesh patch. Her heart had to heal after surgery for about a year, but now Amaya is full of energy and can do anything other kids do. She loves staying active with gymnastics, swimming, and dancing. Amaya wants people to support the Kids Heart Challenge/American Heart Challenge to learn how to take care of their hearts and help save lives.

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
