

Arianna Survivor

Arianna was born with four heart defects and underwent open-heart surgery as a baby to remove her pulmonary valve. Despite this, she remains very active and enjoys playing sports and spending time with her pets. Without a valve, she tires easily but uses softball and basketball to build her strength while awaiting a replacement. Arianna encourages others to exercise and eat healthy foods to maintain healthy hearts. She is proud to help raise money to support children like herself.

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
