

# Camryn Survivor

When Camryn was seven years old, doctors discovered a hole in her heart and successfully repaired it with surgery. Although Camryn sometimes has trouble sleeping, she feels much better now. She enjoys sharing her story to reassure other kids who might face similar experiences. Camryn loves participating in Kids Heart Challenge/American Heart Challenge because it's fun and allows her to help kids with special hearts.

**The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.**

**Together, we are creating a world of longer, healthier lives.**
