

Dalton

Survivor

Dalton encourages everyone to stay active and exercise because not everyone has that ability. Dalton had a stroke as a newborn and had to stay in the hospital for several weeks before ever going home. His parents were worried about him but thanks to his great doctors, he is now a healthy kid and an advocate for heart health. Dalton wants everyone to support the American Heart Association to help even more kids like him have another chance at life.

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
