

Daniel

Advocate

While Daniel's dad was driving him and his brother, Gabriel, home, he started having severe chest pains and nearly crashed the car. After safely getting them home, he collapsed, and Daniel realized his dad was having a heart attack that escalated to cardiac arrest. Daniel and his oldest brother performed CPR while Gabriel called 911. Daniel is thankful for the CPR training he received at school, which helped him save his dad's life. Daniel believes everyone should learn CPR, especially kids because they can save their loved one's life too.

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
