HELPING HEARTS

Jojo

Survivor, 5th Grade

When Jojo was seven years old, doctors detected a heart defect called Atrial Septal Defect, which was a large hole in his heart. He was also missing the wall between his upper two chambers. At eight years old, Jojo had open heart surgery. He now wears his scar proudly because it reminds him that he is a survivor. Jojo has always loved sports and can continue to play with a healthy heart.

THE KIDS HEART CHALLENGE FUNDS RESEARCH THAT HELPS KIDS, LIKE JOJO, HAVE LONGER AND STRONGER LIVES. YOUR SUPPORT HELPS FAMILIES LIKE JOJO'S HAVE HOPE AND FOR THAT THEY ARE SO GRATEFUL.

TOGETHER, WE ARE CREATING A WORLD OF LONGER, HEALTHIER LIVES.
