

Poulima Survivor

At just three days old, Poulima suffered a cardiac arrest during his open-heart surgery. Luckily, doctors saved his life. Since then, he has had many surgeries and procedures to help his heart get stronger. Poulima can't do everything his friends do, but surgery made him realize how brave he is, so he always stays positive and hopeful for the future. Poulima is thankful to the American Heart Association for their help in keeping him alive. He is a heart warrior!

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
