

Ryder Survivor

During his school basketball practice, Ryder went into cardiac arrest. He was saved by a team of doctors through an AED and CPR. He is grateful that he is completely back to normal and has a healthy heart. Ryder is an advocate for heart health and getting the proper tests to check your body. He wants people to support Kids Heart Challenge/American Heart Challenge because the heart is the most important organ in your body and should be prioritized by everyone.

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
