

Sebastian Survivor

At nine years old, Sebastian noticed he was having a hard time breathing while being active. Many doctors thought he was okay until the right doctor found his heart condition. Sebastian is unable to play sports anymore and visits the doctor often. He knows he has a lifelong condition but feels better on his medication and eats healthy to prevent other problems. Sebastian wants people to support Kids Heart Challenge/American Heart Challenge because of their important research that helps kids like him with special hearts.

The Kids Heart Challenge and American Heart Challenge funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
