HEART HERO

Mary Myers

Survivor, 2nd Grade

Mary Myers was born with a rare heart defect that caused her to suffer her first cardiac arrest at three months old followed by a second cardiac arrest after her open-heart surgery. For the first few years of her life, Mary Myers had to go to the doctor and physical therapy often. Despite a few health issues growing up, she began to recover and now visits her cardiologist just once a year and loves gymnastics, cheer, and dancing. Mary Myers' heart may be different, but she is a miracle!
