

**Lub-Dub** 

 **Lub-Dub**

**Lub-Dub** 

Lub-dub, lub-dub, lub-dub—that's the sound your heart makes as the valves open and close. Catchy tune!

# No. 18

## Directions:

Borrow a stethoscope and let each child hear his or her heartbeat. Or, have each child make a stethoscope by fitting one end of a length of rubber tubing over the small end of a funnel. (To make the funnel, cut away the bottom part of a plastic twoliter bottle.) The child places the open end of the funnel over the heart and the unattached end of the rubber hose to his or her ear.
