**AMERICAN
HEART
CHALLENGE™**

Oliver

Survivor, Grade 4

Oliver was born with a heart condition called Tetralogy of Fallot, which means his heart didn't form in the usual way. Since then, he's had several surgeries and other treatments to help his heart grow stronger. Oliver recently got a new heart valve, which helps him run farther and do more of what he loves.

Oliver likes playing baseball and spending time with his friends. He's excited to be part of Kids Heart Challenge/American Heart Challenge and wants other kids with heart conditions to know they're not alone. By sharing his story, Oliver hopes to inspire others to support the American Heart Association's lifesaving work.

The **Kids Heart Challenge** and **American Heart Challenge** funds research that helps kids have longer and stronger lives. Your support helps families have hope and for that they are so grateful.

Together, we are creating a world of longer, healthier lives.
